State Summary of Library Statistics

Each year the State Library sends annual report forms to California's academic, public, special, state agency, and county law libraries. Statistical data from those reports are tabulated in this publication, with directory listings published in the companion volume, *California Library Directory*. Although the statistics program and these publications are promoted as widely as we can, participation for most is voluntary (public libraries are required by the Education Code to report annually to the State Librarian) and some choose not to do so. This makes the state summary less than complete.

California cooperates with the National Center for Education Statistics in the collection of uniform public library statistical data nationwide for national compilation and publication, annually, in the federal Ed Tabs series of statistics for educational institutions throughout the United States.

FISCAL YEAR 2005 - 2006

For this fiscal year four hundred and four libraries of all types submitted data to this program. Four public libraries (Amador County, San Juan Bautista, Santa Monica and Vernon) did not submit an annual report this year and those libraries appear with almost no data in the tables of this publication.

We estimate there are at least 1,000 libraries in operation in California, exclusive of school libraries, so data in this publication is about 40% complete this year. Statewide Summary data appears on pages 4 - 9, below.

By type of library, those reporting data and included in this statistics publication are:

179 public libraries:

- * By jurisdiction, there are 49 county, 111 city, 1 combined city-county, 12 district and 6 Joint Power Authority public libraries.

By level of service, in this fiscal year, California public libraries included:

- * 2,436 total public service points, including mobile library service stops.
- * 166 main libraries. Administrative headquarters are not included, and some county or district libraries have no main library.
- * 602 branch libraries. A branch is an extension library open some part of each of five days a week, has at least 1,400 square feet of floor space, a general book collection of at least 7,000 volumes, and is staffed with the equivalent of at least one librarian and one clerical employee during hours open for service.
- * 325 library stations. A station is a library structure smaller than a branch, providing a lower level of service.
- * There are 60 mobile libraries operated by 41 libraries with 1,343 mobile library stops. A mobile library stop is a location visited by a bookmobile or other traveling library.
- * Combining main, branch, station and the number of mobile libraries, there are 1,153 public library outlets reported. Excluding mobile libraries there are 1093 library outlets.

Public Library coverage of special note:

Emeryville and Piedmont are included with Oakland.

Glenn County is served by Orland and Willows city libraries.

Hillsborough is served by Burlingame and San Mateo city libraries.

Santa Barbara County is served by the three city libraries of Lompoc,
Santa Barbara and Santa Maria.

Sierra County is included with Plumas County.

109 academic libraries:

- * 21 state supported academic libraries.
- * 62 community college libraries.
- * 26 private academic libraries.

63 special libraries:

- * 8 law libraries.
- * 20 medical libraries.
- * 4 libraries operated by for profit organizations.
- * 18 libraries operated by non-profit organizations.
- * 3 libraries for U.S. government agencies and installations.
- * 2 resident libraries at state institutions and schools.
- * 8 special libraries at state government offices.

36 of the 58 county law libraries.

There are 58 county law libraries in the state, 36 of which provided report data this year.

In the State Summary table that follows on the next two pages, the current year plus the two preceding years are shown. Totals reflect the level of participation in the survey itself. Participation levels for academic, special and county law libraries vary much more than those for the public libraries.

State Summary Column Headings

Five Year Public Libraries Trend Charts

The data for each of the charts is generated by summing the item for all responding libraries and then dividing by the sum of the population served for those libraries to obtain the per capita figure. Not all libraries report all items for all years but the number of non-respondents is relatively small and the per capita approach reduces the influence of the number of respondents skewing the results.

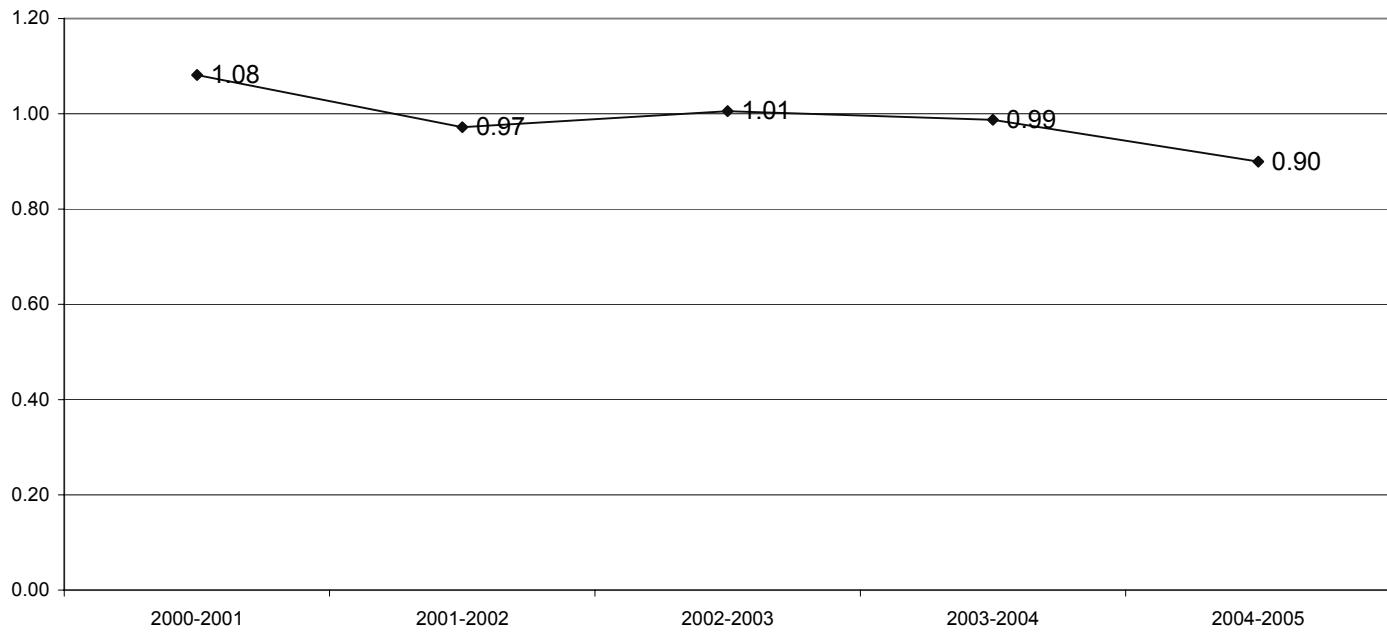

Each library serves a unique clientele and therefore local trends may vary from the statewide aggregate. The statewide figures are helpful in analyzing broad changes in services and as a background for understanding local experiences.

Public Libraries

California's 179 public libraries are departments of local government: city, county and special district. They vary widely in size and strength, from Alpine County with fewer than 1300 residents to the City of Los Angeles with almost 4 million, and cover the state with a network of branch libraries, bookmobiles and other extension services. Most participate in cooperative library systems and/or inter-type networks comprised of libraries in adjacent counties, offering equal access and sharing of resources among all library users. Address listings may be found in the companion volume, California Library Directory.

There are eleven tables:

Profile	Population, service facilities, staffing
Income	Local and federal revenue, state allocations
Expenditures: Detail	Telecommunications, preservation, etc.
Collections	Print, microform, audiovisual
Services	Circulation, ILL, reference
Services to Children	Borrowers, materials, programs
Library Literacy Services	Adult and family literacy services
Salaries	Starting and ending salaries for a variety of positions
Electronic Services	Internet Terminals, Users, E-Rate and Teleconnect Fund usage
Library Comparisons	Per capita and other comparative measures
Mobile Libraries	Bookmobile services, staffing, circulation

Data on the tables are taken from annual reports submitted to the California State Library. Preliminary data were compiled from these reports and provided to reporting libraries for review. Additions and corrections received from libraries up to the cut off date are incorporated in the tables in this *California Library Statistics* publication and are also available to California libraries and networks through the California State Library web site and private vendors providing statistical comparison tools.

No annual report was received from four libraries this year, Amador County, Santa Monica, Vernon and San Juan Bautista.

Public libraries are grouped into seven categories by size of population served, this year the categories were modified slightly to result in more even grouping:

- Group 1, over 500,000 population (16 libraries)
- Group 2, 150,000 to 500,000 population (31 libraries)
- Group 3, 100,000 to 150,000 population (25 libraries)
- Group 4, 70,000 to 100,000 population (20 libraries)
- Group 5, 50,000 to 70,000 population (26 libraries)
- Group 6, 25,000 to 50,000 population (29 libraries)
- Group 7, under 25,000 population (32 libraries)
